 Christchurch, NZ

PROFILE

.NET / Power Platform developer with 2 years' experience building Dynamics 365 and Dataverse solutions for New Zealand clients. Strong in C# plugins, TypeScript web resources, Power Automate, Dataflows, KingswaySoft integrations, and Azure Function Apps, with an interest in maintainable, strongly typed Dataverse development. Experienced in migration and modernisation work and working directly with client stakeholders from requirements through delivery.

EXPERIENCE

2024–Present

Adaptable Consulting — Developer

Auckland, NZ

Dataverse Plugin Development: Designed and built C# Dataverse plugin projects from scratch; implemented custom Dynamics business logic across multiple model-driven app solutions.

On-Premises Migration: Modernised legacy Dynamics for a major NZ tertiary education client; reworked deprecated JavaScript into TypeScript web resources; replaced SQL stored procedures with Dataflows.

TypeScript Modernisation: Pioneered TypeScript + Webpack for Dynamics web resources; established monorepo architecture with managed solution delivery and CI/CD pipelines.

Automation & Integration: Built SharePoint document automation, complaints/intake workflows with approval flows, Teams cards, and DocumentCorePack templates. Built Azure Function Apps with storage queues and managed identity.

Client Delivery: Worked directly with clients using Azure DevOps boards; supported demos, requirements gathering, UAT, and post-delivery support.

SKILLS

C# / .NET

Dataverse / D365

TypeScript / JavaScript

Power Automate

Azure Functions

KingswaySoft

Git / Azure DevOps

SharePoint / Teams

DocumentCorePack

TOOLS & TECHNOLOGIES

D365 & Dataverse: Model-driven apps, solution management, customisation, Business Process Flows

Plugins: C# Dataverse SDK, plugin registration, custom API

Web: TypeScript, JavaScript, Webpack, Vite

Automation: Power Automate, Dataflows, Power Apps

Integration: KingswaySoft, Azure Functions, SharePoint, Teams

ALM: Azure DevOps, Git, CI/CD, managed solution delivery

Docs: SharePoint, DocumentCorePack, Word templates

EDUCATION

University of Canterbury — Bachelor of Science, Computer Science major

Software engineering, databases, algorithms, Python data analysis, C/C++ systems.

St Peter's College, Auckland — Cambridge A Levels

CERTIFICATIONS

PL-200 — Power Platform Functional Consultant Associate

PL-900 — Power Platform Fundamentals
